Digitalskola, Batch 11

## Problem Statement

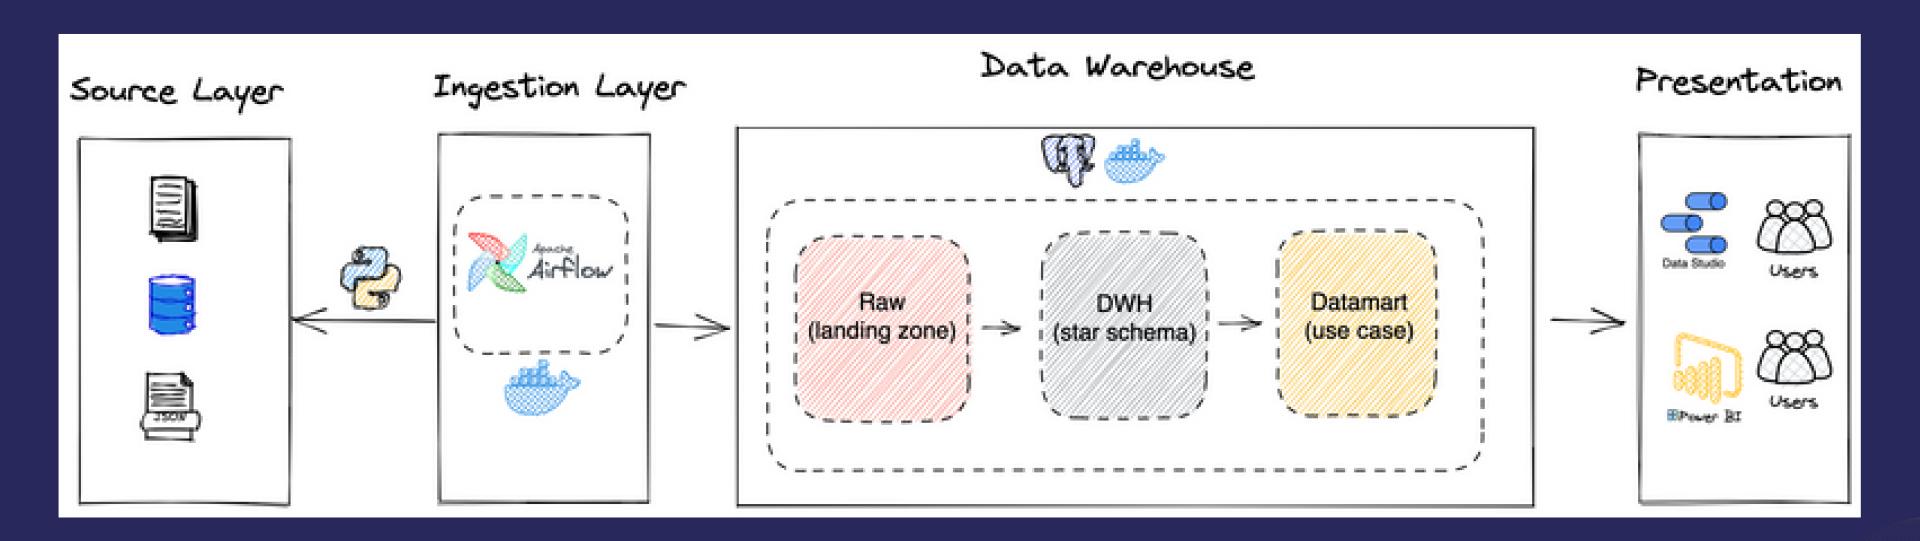

Sebagai Data Engineer, pada project ini kita diminta membangun sebuah data warehouse untuk kebutuhan analytics. Sehingga kebutuhan analisis bisa dilakukan pada OLAP bukan OLTP.

User ingin mendapatkan insight: Bagaiaman pengaruh curah hujan & suhu terhadap review / rating sebuah restaurant

## Goals

- Data Ingestion
- Data Warehousing (star schema)
- Presentation Layer (Dashboard / insight)

#### Architecture High Level Diagram

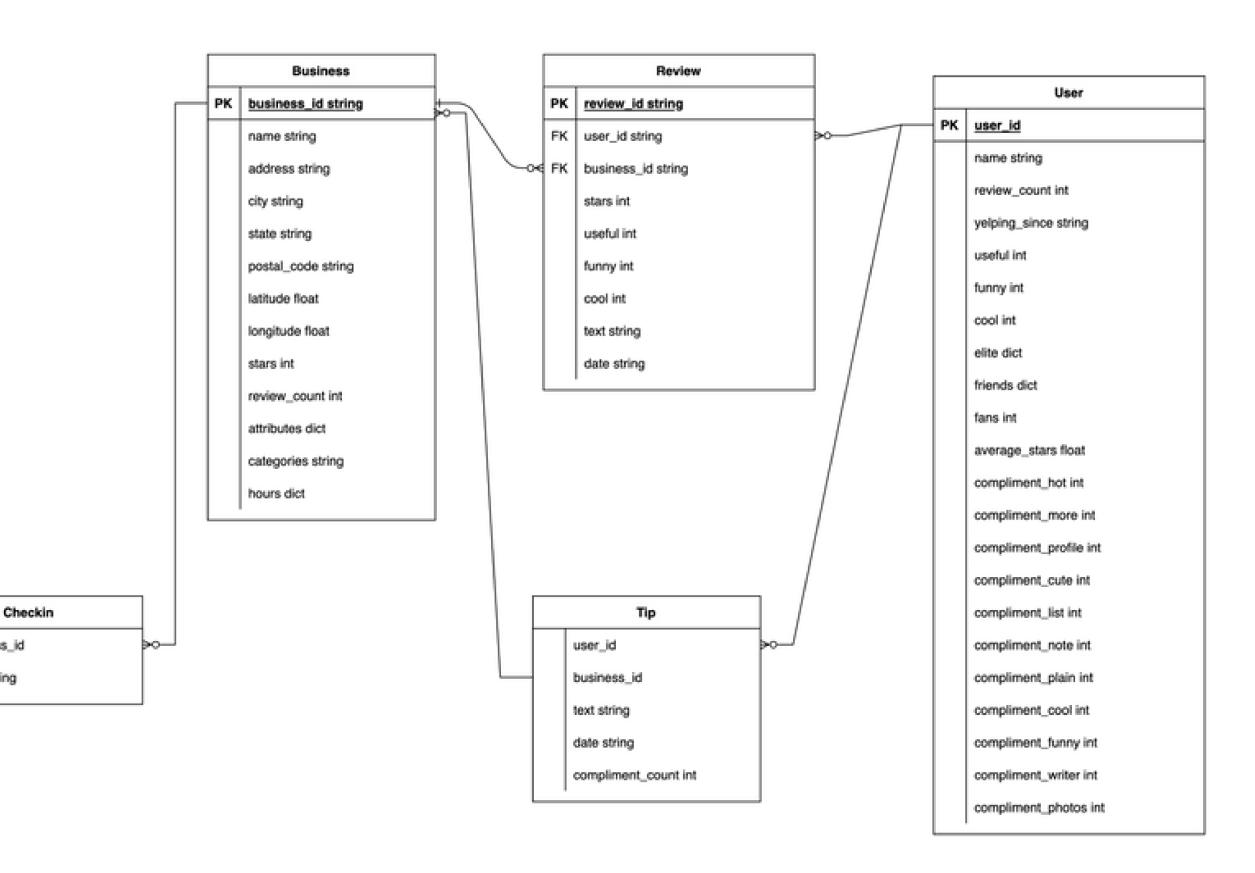

#### **Data Source**

- Yelp Kaggle (JSON)
- Las Vegas Percipitation (CSV)

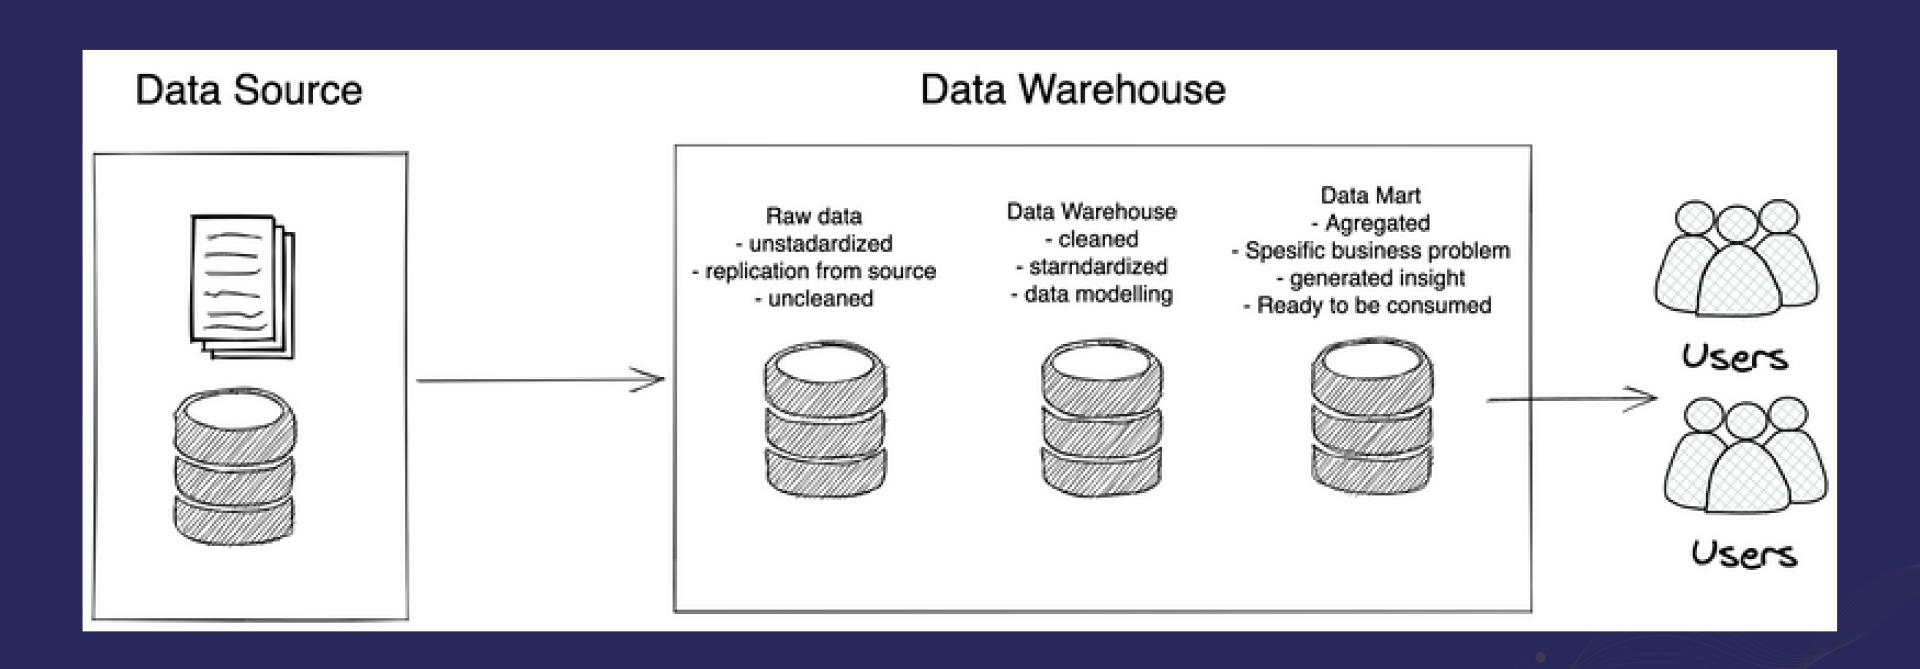

business\_id

date string

• Temperature Degree (CSV)

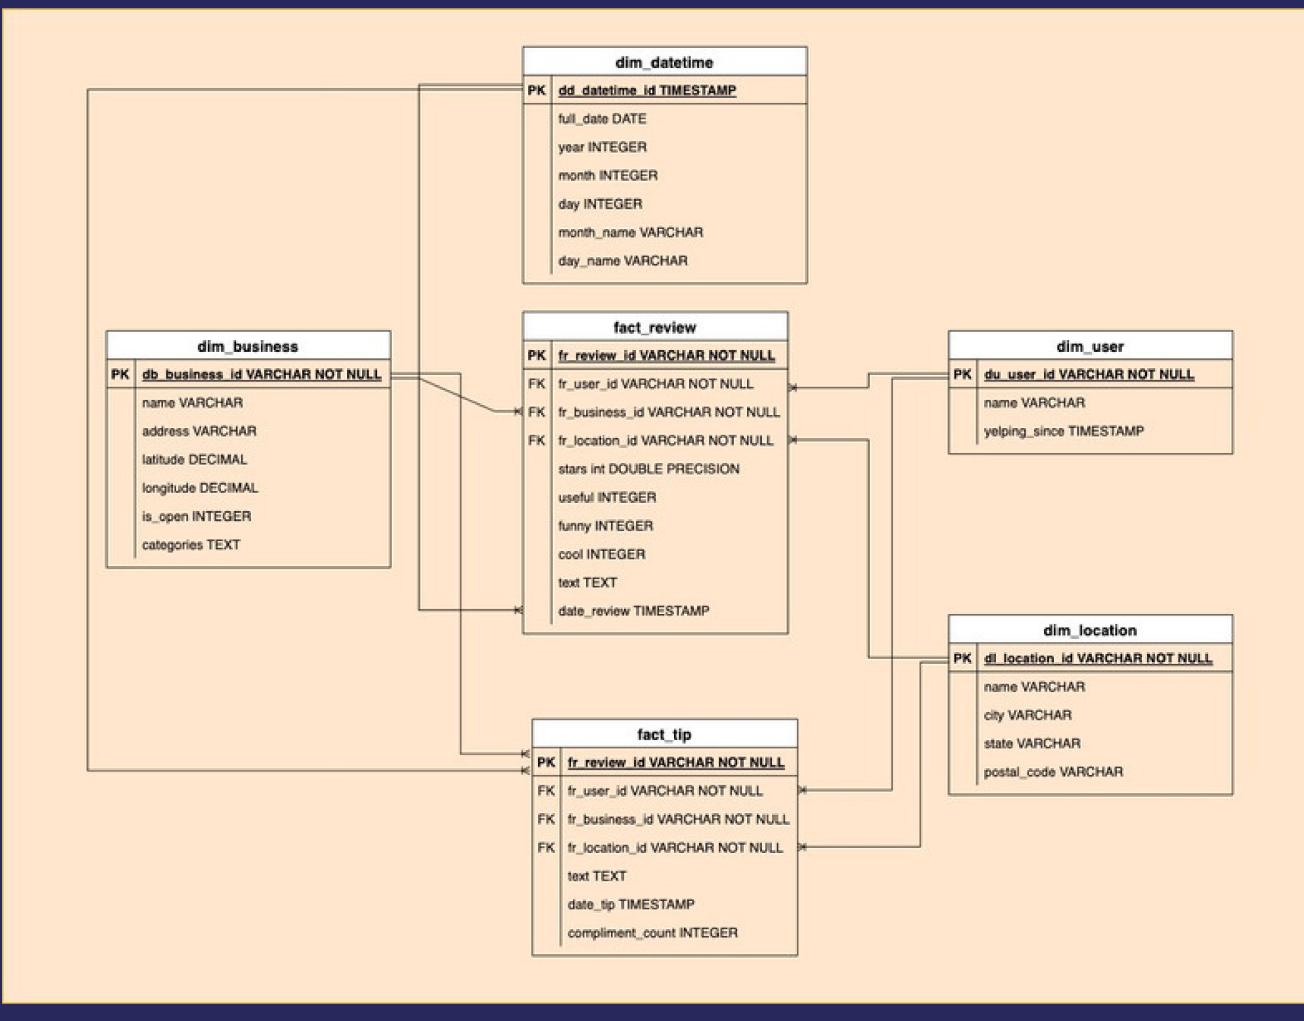

#### Architecture High Level Diagram

### Data Modelling

Star Schema
